Independent Power Source
Load Sensing Trailer Lighting Systems
Solid-state Independent Power Source

Design Features

- Independent power source can be used for load sensing trailer lighting systems
- Provides an independent power source for caravans trailer lamps
- Isolates the towing vehicles electrical system from the effects of connecting a trailer or caravan systems to towing vehicle

Specifications

- 12VDC Only
- Box dimensions: H 12mm x D 49mm x W 98mm

Part Numbers

B1895E Five fused lines (Output to Trailer), 1.5 metre harness
B1891E One fused line (12V Direct Supply), 0.3 metre harness
